Supporting our Partners to

Global Lifetime Service

Sanrai offers Global Lifetime Service on all our medical devices. In today's busy world, with people living and travelling globally, using a medical device no longer restricts patient to being at home. As such, we offer technical service for any products that are supplied through Sanrai, no matter where in the world the patient is located.

We understand that a medical device is essential and may need support even after the warranty period ends. With Global Lifetime Service, our customers can trust the quality of our devices, and be confident that Sanrai is with them every step of the way!

Easily Access Useful Information

Scan the QR next to each product in the catalogue to be taken to our website www.sanrai.com where you can find more information including specific product brochures, regulatory information, and marketing materials.

To access all information, create a login by simply pressing the Login menu option bringing you to a page where you can register with only your email address.

Develop Markets Together

Co-branding and Marketing Support

Sanrai is here to support your business. Launching new products and finding new opportunities requires awareness and patient education, for both patients and clinical staff. Sanrai has, and is able to create a wide range of customizable marketing material to suit your needs. Including:

- Product launch and advertising campaigns
- Posters, display and standing banners
- Clinical presentations and educational materials
- Email newsletters and flyers

Our design team will work alongside you to create and develop collateral tailored to your specific requirements, market sensitivities, and sales channels. There is no charge for this service. We believe in working alongside our partners to help drive awareness and product sell-through.

OxyPure

Description

The OxyPure Oxygen Concentrator delivers up to 5 LPM continuous flow oxygen. This innovative Oxygen Concentrator delivers oxygen up to 96% purity and weighs only 16 kgs, making it a truly robust and reliable design. At a noise level of only 40 dB, it is one of the quietest machines in the world.

The OxyPure 5 Oxygen Concentrator is suitable for most oxygen prescriptions. With a dedicated service program, the OxyPure is guaranteed to last.

- 1-5 LPM
- Robust and reliable design
- Suitable for most oxygen prescriptions
- Fast and easy maintenance
- Oxygen and performance monitor
- Digital display
- Oxygen purity alarm

Inogen G5/Rove6

Description

Newly renamed from the Inogen 5, the Rove 6 is a world leading portable oxygen concentrator (POC). POCs are ideal for staying mobile while needing long term oxygen therapy. When patients are more mobile, their quality of life improves, and they have fewer hospitalizations. Offering 1 to 6 flow settings, the Rove 6 is one of the most powerful, lightest, and quietest units available to the oxygen user. The Rove 6 has the highest oxygen output of any portable device today!

With Inogen, you can jump in the car to run errands, take a weekend trip to see family, and even take it on a plane to go on holiday.

- Single or double battery
- With auto pulse mode
- AC/DC power supplies
- Longest battery life
- Intelligent delivery technology
- FAA approved
- Made in USA

iGo2

Description

The iGo2 portable oxygen concentrator is the only device in the world today designed to match your activity level. With patented Smart Dose Technology, when the machine detects your breath rate is increasing, it automatically delivers more oxygen per breath. It also has one of the most sensitive trigger mechanisms in the market, ensuring that you receive oxygen with every breath you take.

As the benefits of maintaining a mobile lifestyle even with COPD continue to be proven, the iGo2 ensures you can maintain positive levels of activity over the years and keep enjoying a high quality of life. With the iGo2, it is easier to visit family and friends, go on walks, and travel than ever before!

- Smart Dose Technology
- Extremely sensitive breath detection
- Additional batteries available
- FAA approved
- Made in the US

Oxlife Independence

Description

The world's first 24/7 Portable Oxygen Solution. The Oxlife Independence by O2 Concepts is the only portable concentrator on the market specifically designed to handle the rigors of 24/7 use. With continuous flow up to 3 LPM and 6 pulse settings, the Oxlife Independence is the ideal solution for your most demanding oxygen patients.

With the largest sieve beds of any POC and its patented Energy Smart technology, the Oxlife Independence will outlast any POC on the market.

- Longest battery life in its class
- Integrated DC power supply - no separate power supply
- Robust exterior made of polycarbonate & lightweight metal
- FAA approved
- Made in USA

DeVilbiss 5 Liter Oxygen Concentrator

Description

The Drive DeVilbiss Compact 525 is a stationary oxygen concentrator that produces up to 5 litres per minute of medical grade oxygen. It is made in the US and is one of the smallest 5L devices available today, weighing only 16 kgs.

At less than 40 dB, it is also one of the quietest concentrators in the world. The flow meter starts from 0.5 LPM. With a robust design, the Compact 525 is durable and reliable even in higher temperature and humidity environments. It is easy to use for all patients.

- In built alarms
- 16 kgs
- Up to 96% medical grade oxygen
- FDA and CE Approved
- Made in USA

DeVilbiss 10 Liter Oxygen Concentrator

Description

The DeVilbiss Compact 1025 is one of the most reliable and robust stationary concentrators in the world. DeVilbiss 1025 concentrator is one of the only American made 10LPM devices available in both 115V and 220V configurations. With such a small footprint, it easy to use in clinical and homecare settings.

The DeVilbiss 1025 is suitable for most oxygen prescriptions, especially for patients requiring more than 5 LPM. With a dedicated service program, it is guaranteed to last.

- Flow meter from 2 to 10 LPM
- 19 kgs
- Up to 96% medical grade oxygen
- FDA and CE approved
- Oxygen purity indicator
- Made in USA

PulmO2

New

Description

Drive DeVilbiss partnered with Sanrai International to develop the PulmO2 designed to be energy efficient, resilient, and adapted to a clinical environment. The PulmO2 saves up to 64% of the energy required compared to a traditional 10L device, providing significant savings over the total lifetime of the device. Critical components are protected by check valves and shut off valves to increase durability especially in harsher environments. With QR codes and stickers on the unit, helpful information is easily accessible on the PulmO2.

- Soft start up, solar friendly
- DC Compressor allowing a wide AC voltage range of 100-240V 50/60Hz
- Designed to operate & store in simultaneously hot, humid, and higher altitude environments
- Multi-language labeling on product and QR codes for easy access to useful information

Aluminum Cylinders

Description

High quality, USA manufactured aluminum medical grade cylinders. Used for home oxygen therapy, emergency medical services (EMS), pre-hospital care and hospitals, nursing homes, and other medical institutions. With the acquisition of a Luxfer facility in 2021, Metal Impact can now produce large hospital grade aluminum cylinders.

- Small and intermediate models contain thread sizes 50-16 UNF-2B
- Large models (M33, M60, M90 and M122) contain 1.125-12 UNF-2B
- Includes standard medical valve
- Lightweight, high strength 6061-T6 alloy helps increase patient mobility

Sanrai Cylinders

New

Description

High quality, DOT certified aluminum and steel cylinders in any size needed. The Sanrai cylinders are a cost-effective option with all certifications for homecare or hospital cylinder requirements for medical grade oxygen. While aluminum cylinders can be safely re-certified with hydrostatic testing, at the large hospital grade size, steel cylinders are a budget friendly solution.

- Include standard medical valves
- Manufactured to DOT and ISO requirements
- Sizes from M2 to J in both steel and aluminum
- All colors compatible with different national standards available

Dimar

Description

NIV therapy is designed to keep patients out of the ICU and prevent them from intubation. Total Full Face masks and helmets are considered the leading non-invasive ventilation (NIV) solutions. Using high quality silicon and plastics, the Dimar range of products, developed and manufactured in Italy, are the most innovative solutions available today. With superior fixation solutions, patients are more comfortable using Dimar compared to any other mask.

By keeping patients out of ICUs, hospital costs and patient outcomes are significantly improved.

- DiMax Total Full Face Mask
- Flow generators
- NIV and CPAP Helmets
- Easy Vent Mask
- CE certified
- Made in Italy

Lung Flutter

New

Description

From Clement Clarke, the Lung Flutter is an easy to use mucus clearance device. As a patient breathes into the Lung Flutter, vibrations are felt in the airways and lungs. These vibrations shake loose sticky mucus allowing patients to gently cough out the secretions. Mucus build up causes infections and challenges in breathing, even lung damage if left for a prolonged period.

The Lung Flutter is a simple tool to help every patient at home without needing to see a physio or respiratory therapist.

- Lightweight and extremely portable
- Simple to use
- Reusable and easy to clean
- Short sessions required for maximum effectiveness

Vitalograph

Description

Developed and manufactured in Ireland, Vitalograph is a leading respiratory diagnostic company. Starting from simple point of care screening devices for asthma, COPD, and other respiratory diseases to spirometry to complex Pulmonary Function Tests and research tools, Vitalograph is a complete solution. With software that is easily customizable and consistent across all devices and a range of consumables designed for any spirometers and respiratory lab testing devices, Vitalograph can support any type of respiratory testing.

- Spirometers
- Respiratory Muscle Strength Testing
- Respiratory Monitors and Screeners
- Consumables
- Remote Monitoring

Vitalograph
Your cardio-respiratory partner

PulmOne

Description

The MiniBox+ pulmonary function test (PFT) is the world's first portable, cabinless PFT device with gasless LVM plethysmography, spirometry, and diffusion testing. Providing equivalent readings to a Body Box using a fraction of the space, the MiniBox+ is the perfect device for space constrained clinics looking to provide complete lung diagnostics. With easy to understand reports and software, the MiniBox+ is a handy tool for any clinician. Without a body box, patients are much more comfortable too!

- Fully automatic lung volume measurements and DLCO
- Spirometry, lung volumes, and DLCO in 15 minutes
- Patient friendly with cabinless testing
- Intuitive user interface, easy-to-access reports

PulmOne
PFT Outside The Box

Sanrai Oxygen Accessories

Description

Sanrai provides a complete range of oxygen accessories for hospital and homecare use. We offer regulators for homecare cylinder use and flowmeters and regulators for hospital use with any standard inlet and outlet option. Regulators and flowmeters are crucial for maintaining the correct oxygen flow for patients at home and in the hospital. Sanrai provides the entire spectrum of high quality products and affordable pricing.

- DISS and Barb Outlet regulators from 1 to 25 LPM
- Complete range of inlet and outlets
- Single stage pressure and oxygen regulators
- Single and dual tube type flow meters
- Click style and wall mounted flow meters
- Available with or without humidifier bottles

SANRAI
OXYGEN ACCESSORIES

MaxTec

Description

The MaxTec oxygen analyzer is an independent device used to measure the oxygen purity of an oxygen concentrator or other oxygen producing device. When treating a patient with oxygen therapy, it is vitally important that the purity of oxygen be medical grade. An analyzer is an essential tool for any workshop or hospital to have on hand.

- Simple Handi+ analyzer
- Ultrasonic analyzer with more parameters
- FDA approved
- Manufactured in the US

maxtec

ChoiceMMed

Description

ChoiceMMed is the leading manufacturer of fingertip and handheld pulse oximeters sold all over the world. The fingertip oximeter has 6 display modes with 4 different orientations. The handheld is designed for hospital use and can treat neonatal through adult patients. Oximeters are extremely important for measuring a patient's SpO2 or blood oxygen saturation levels.

The ChoiceMMed oximeters are some of the most accurate devices available today for both patients and hospital use.

- CE and FDA Approved
- Different models available
- Battery operated
- Multiple waveforms

Drive DeVilbiss HomeCare and Rehab

Description

Separated into several categories: Mobility, Bathroom, Homecare, Scooter, Kids, and Vitality, the Drive range of homecare and rehab products are designed to make moving around and living with a high quality of life as easy as possible. The wheelchair range includes lightweight and cost effective options along with higher end tailored solutions. With walkers, rollators, and other mobility aids, patients will find it easy to stay active and leave the home. Our extensive range of patient lifters and other bathroom products, make maintaining a high quality of life simpler than ever before.

- Wheelchairs
- Walkers, rollators, canes
- Bath lifters, shower aids, toilet support
- Scooters
- Large range of sizes for all body types

Drive Medical Kids Mobility Products

Description

The Drive Medical kids range is one of the most thorough and comprehensive set of kids mobility products available today. This range consists of bath lifts and seats, walking aids, patient positioning seats and kids wheelchairs. For those children in need of mobility assistance, the Drive range can help them live a comfortable life with minimal disruptions.

With more flexibility and a mobility product range specially adapted just for children, give your child a smile today. The Drive Medical kids mobility products are known for their durability and reliability.

- Kid friendly and colorful
- Easy to use
- Different sizes available
- Durable and reliable

Drive Medical Bathroom Products

Description

The Drive Medical Bathroom range is one of the most thorough and comprehensive bathroom ranges available today. This range consists of bath lifts and seats, shower stools, chairs, and wheelchairs, toilet seats, commodes, and wheeled commodes, and safety products. These products are designed for patients who can shower and use the bathroom by themselves with just a little assistance to patients that need complete support. The Drive Medical products are known for their durability and reliability.

- Wide range of sizes
- Hygienic and safe to use
- Long lasting, durable, and reliable
- Designed for all body shapes and sizes

Drive Medical Patient Lift Products

Description

The Drive Medical Patient Lift range is one of the most thorough and comprehensive ranges available today. This range consists of patient lift products, overbed tables, bath lifters, and slings. These products are designed for patients that need assistance to be lifted or transferred during their care. The Drive Medical products are known for their durability and reliability.

- Easy to Use
- Help the most immobile patients
- Durable and Reliable

Sanrai Mobility

Description

The Sanrai Mobility range has walking canes, crutches, and bathroom safety grab bars. Designed to complement a more comprehensive rehab and mobility product range, these items are simple and effective tools to provide balance and security while walking and in the bathroom. With a variety of canes and crutches with adjustable heights and different bases, patients can find what fits their individual needs.

- Aluminum and powder coated canes and crutches
- Foldable walking stick
- Stainless steel and plastic grab rails
- Different lengths and sizes

WiTouchPro

Description

The WiTouchPro uses Transcutaneous Electrical Nerve Stimulation (TENS) to diminish pain and replace it with a tingling or massage like sensation. It provides deep penetrating pain relief right where you need it with large electrodes that adhere with gel pads. It's a safe, simple, and effective pain relief therapy specifically designed to combat back pain without medication.

WiTouchPro is an alternative to pharmaceutical opioids with no risk of addiction and no tolerance build up over time. It's as effective the first time as the hundredth time to manage and diminish pain.

- Deep penetrating pain relief right where you need it
- Discrete and wearable for all day relief with the touch of a button
- Large integrated electrodes for maximum coverage
- Alternative to pharmaceutical opioids with no risk of addiction

PhysiCool

Description

PhysiCool is a set of cooling bandages that are designed to treat shoulder, knee, leg, back, and other injuries. PhysiCool's reusable cooling bandage combines instant cooling, compressors, and support. These bandages have been clinically proven to be very effective in reducing pain and inflammation, allowing people to mobilize quicker, shortening the recovery time from any injury or surgery.

PhysiCool lowers the temperature of the skin and underlying tissue. This cooling effect numbs the nerve endings to reduce pain.

- 2 sizes of reusable bandages
- Swelling/Inflammation Reduction
- Used after Total Knee Replacement Surgeries
- Instant Cooling
- Rechargeable bandages simply by adding more coolant liquid

physiCool*
Rapid Relief. Rapid Recovery.

Somnomedics

New

Description

The SOMNOmedics sleep diagnostics range is one of the most comprehensive diagnostic set of tools starting from basic screening devices to a full Level 1 Sleep Lab Polysomnography. With integrated software and easily added on sensors, you can start with the small, compact, simple SomnoTouch that includes blood pressure, ECG, oximetry, actigraphy, and PWV for a 22 channel sleep diagnostic tool, and upgrade it to a full in lab PSG device. With SOMNOmedics, the software is easy to read and consistent across all models.

- Sleep Diagnostics from Home Screening Tools to Sleep Lab PSG
- Easy to use, robust devices and sensors
- Small and lightweight full body mounted system
- Patented technology for continuous blood pressure monitoring during sleep

SOMNO
medics

Hypnus

Description

The Hypnus range of CPAP and BiPAP is one of the most comfortable and effective sleep and respiratory therapy solutions available in the world today. A CPAP is one of the best treatments for sleep apnea if a patient is compliant. By creating a next generation quiet and comfortable device, patients will happily use their CPAP and improve their health outcomes.

Taking this same approach to their BiPAP range, Hypnus has developed a strong and reliable BiPAP S and ST for patients in need of breathing support while sleeping.

- Auto CPAP, BiPAP S, and BiPAP ST
- Built in humidifier chamber
- Comfort features like ramp time and gradual pressure increase
- Durable and reliable
- CE certified

hypnus

Sol Mask

Description

Sunset's new mask offers premium features without the premium price tag! This is a high quality mask with Easy Pop Cushions that attach or detach from the mask very easily, without painstakingly needing to align pieces. It also has a quiet vent with a honeycomb design to reduce airflow erosion intensity for a gentle and quiet flow. The Sol Mask has very soft and light headgear for maximum patient comfort. Help patients wake up to a brighter day!

- S, M, L sizes
- Replacement cushions available
- Quick release connector

Circul +

Description

The Circul+ is a wearable monitor that measures SpO2, heart rate, blood pressure, ECG, and calculates your ODI. ODI is the oxygen desaturation index, a particularly important number to track for sleep apnea patients.

By wearing the Circul+ while sleeping, sleep apnea patients have a reliable indicator that their therapy is working and their condition is managed. Keep track of your health today!

- Multiple sizes included
- Easy to use App and Dr dashboard
- Up to 16 hours of continuous monitoring possible
- FDA approved

Z2 Auto Travel CPAP

Description

The Z2 Travel CPAP is the world's smallest, lightest, most integrated CPAP. The Z2 Auto delivers extremely responsible and effective therapy at lower overall pressures than a fixed pressure CPAP. The result is a more responsive, a natural breathing pattern, and a more comfortable experience.

Get maximum comfort every night, whether you are at home or in a tent in the middle of nowhere. The Z2 is designed for travelers as it comes with an optional powershell battery backup for 12 hours.

- The Z2 is the lightest CPAP machine available weighing only 285g
- Comes with the Nitelog mobile app which syncs directly with the device
- Can be used with any mask
- Optional integrated PowerShell battery

Connected Health

New

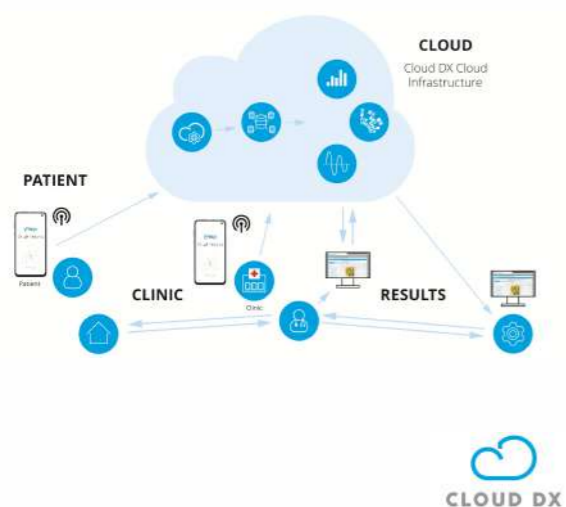

Description

Cloud DX Connected Health Platform is a complete Remote Patient Monitoring, Telemedicine, Wound Care and Patient Engagement application. Patients use best-in-class Bluetooth-enabled vital sign devices connected to the Cloud DX app on a tablet or smartphone to gather accurate vital signs at home. Clinicians can communicate with patients via secure messaging, 2-way video conferencing, scheduled reminders and document sharing and picture sharing.

Extensive workflow support, compliance management and patient engagement tools mean that patients are compliant with their care plans more than 90% of the time. Proven use cases for Connected Health RPM and Virtual Care include chronic disease management, post-surgical recovery, complex pregnancy, rehabilitation, palliative care and mental health

- Studies show patients are highly satisfied, suffer less pain, comply with medications, and are discharged 1.9 days sooner from hospital
- Use for COPD patient management
- Patients are more compliant with their care plans
- Monitor vital signs such as blood pressure, temperature, pulse oximetry, and more

AcuScreen

New

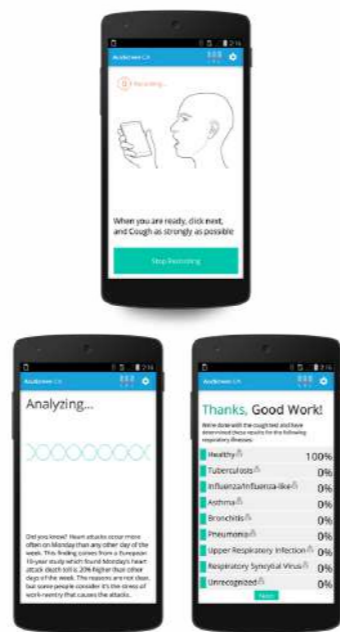

Description

AcuScreen CA Cough Analysis technology is a patented A.I. powered Smartphone Application that can accurately detect respiratory diseases by analyzing the sound of a patient coughing. AcuScreen works on most Android smartphones. The app records cough sounds and analyzes them in real-time, producing a statistical likelihood that a specific disease is present.

This powerful software has been validated in a robust clinical study to be accurate for the detection and classification of acute tuberculosis (TB). The Specificity and sensitivity of AcuScreen for TB exceeds the WHO standard for a community screening tool for TB detection. AcuScreen is now available for large-scale field studies. New features include a Video Observed Therapy (VOT) module for medication adherence management.

- Easy to use app
- Highly sensitive and specific results
- Community screening tool
- AI powered results

FISIO Breast Pump

Description

The Fio Hospital Breast Pump is a range that supports breast feeding and comfort with maximum control by separately adjusting suction and expression. The Fio PRO is designed for mothers to control their own breast pumping experience. The Fio is a little bit easier for an untrained mother with only one knob to turn from stimulation to expression.

With 8 different size and fit options, mothers never have to worry about a difficult pumping experience which is especially important for babies in the NICU. The one way flow compressor system dramatically reduces the risk of any contamination or infection of the milk. The Fio system has no valves making service and maintenance a breeze.

- Gentle stimulation and expression phases
- 4 different sizes of autoclavable shields
- Single and double pumping
- Easy to assemble and clean
- Reduced risk of contamination as there are no membranes

Kittet Minikit Duo

Description

The Kittet MiniKit Duo is an easy to use, mother friendly electric double breast pump with 9 settings for both stimulation and expression.

MiniKit Duo contains the signature patented clean valve technology minimizing all risks of contamination from mother to baby with its unique set up common for all Kitett breast pumps. With 8 different sizes and shapes of breast shields, Kitett ensures maximum comfort for the mother.

The pump is lightweight and discreet with a belt clip for ease of use and batteries for power. The MiniKit range also comes as a single pump option with the MiniKit Solo.

- Single or double pumping
- 9 settings
- Stimulation and Expression – 2 phase technology
- Controlled hygiene “Clean Valve” technology
- Kolor You App

GaleMed Neonatal and Respiratory Consumables

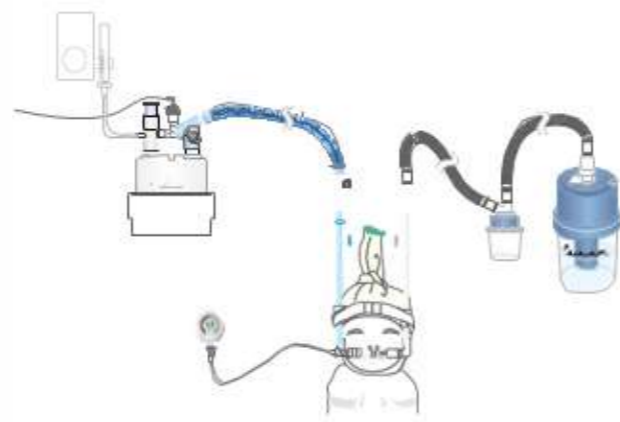

Description

GaleMed has a wide range of neonatal and hospital respiratory consumables manufactured to new CE MDR standards and FDA approval. With the widest range of nasal prongs, the GaleMed Bubble CPAP consumables provide safe and effective respiratory support for neonates with respiratory distress. A Bubble CPAP is the safest way to ventilate a preterm baby without needing any invasive equipment.

The entire range includes anesthesia circuits, airway management, mechanical ventilation, neonatal care, and respiratory care solutions.

- Wide range of sizes serving adult, pediatric, and neonate patients
- High quality and internationally certified consumables
- Wide range of materials including silicon, plastics, and more
- Disposable and reusable

Sanrai International is an innovative medical device distribution company with offices in Latin America, Africa, the Middle East, and Asia. By bringing local expertise to the markets that matter, we can provide the service and support needed to successfully commercialize and supply world class medical equipment.

Imagine a world where the latest healthcare innovations are accessible to patients everywhere. At Sanrai, this is our reality. We partner with local distributors, medical care providers, non-profit organizations, and governments to launch products focusing on what matters most – to better the lives of patients needing inventions to be locally available to survive and thrive.

With our regional offices, Sanrai makes it easy for our customers to buy best in class, high quality medical devices locally without worrying about training, technical support, advertising, and market acceptance. We are there to work with you to bring the latest innovation to your patients!

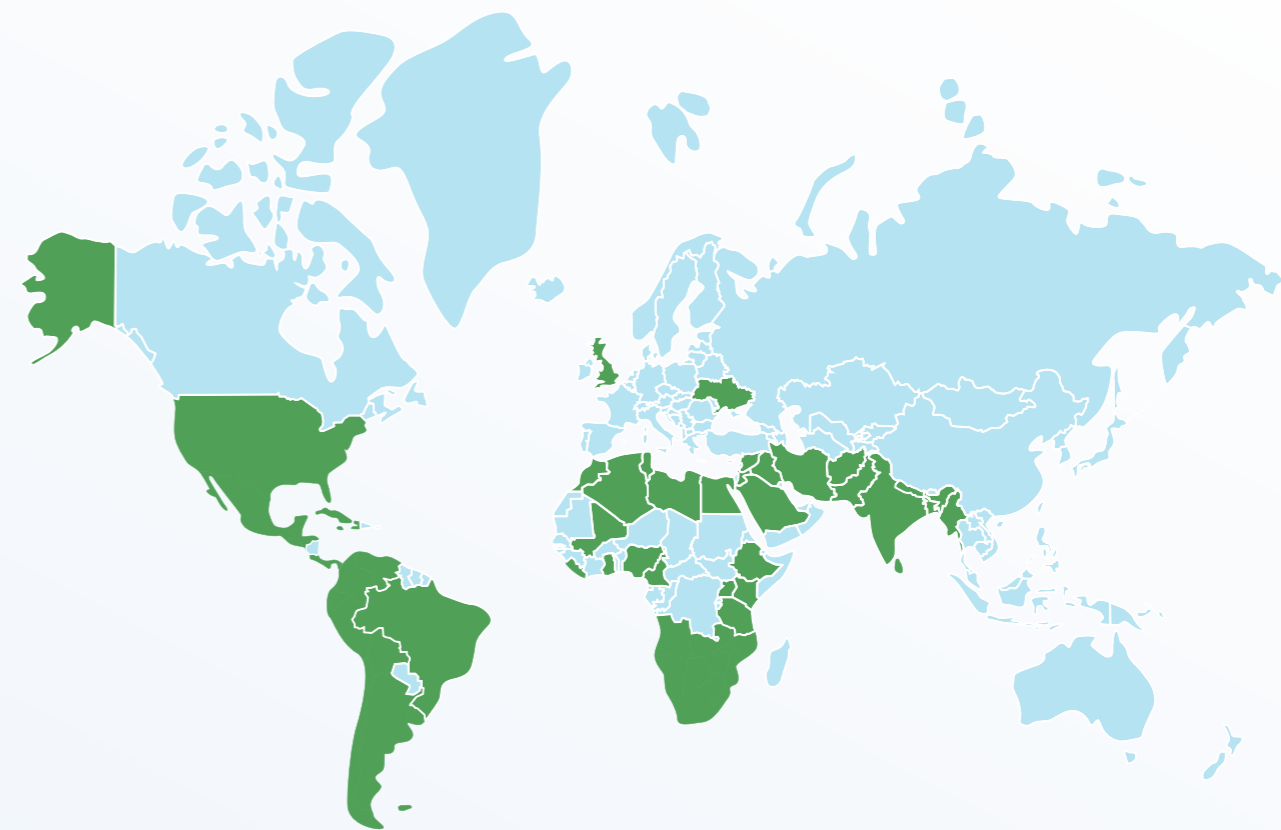

Mission and Values

Our mission is to provide needed products as seamlessly as possible to all corners of the world. Sanrai supplies dynamic and disruptive medical devices to the global healthcare community, leveraging our platform for our partners continued success.

Our goal is to transform healthcare around the world by making the access to innovative medical technology equitable no matter where you are. Sanrai is passionate about working with high quality manufacturers who understand the unique challenges of the emerging markets. We partner with local providers who are committed to fairly distributing innovative products. Sanrai has an experienced and successful team with unparalleled dedication and passion to develop healthcare in difficult markets.

Sanrai has longstanding business partners in more than 65 countries with our focus on emerging markets: **Latin America, Africa, the Middle East, and Asia**. Check out the map to see where we are currently selling products!

Now expanding into East Asia.

We would love to start a relationship with you in markets that we are already selling in or new ones!
